# Surround Technologies Announces New Accelerator<sup>™</sup> for .NET Version 3.3

*Bloomfield, NJ – May 7, 2012 –* Surround Technologies announces the general availability of Version 3.3 of its Accelerator<sup>TM</sup> for .NET software development platform, a premier productivity solution for the development and use of .NET applications.

The Accelerator for .NET generates complete .NET code that integrates seamlessly with IBM i and allows business to enhance user experience while leveraging the power of their IBM i systems. The Accelerator provides a roadmap to develop applications and integrate new technology and advanced capabilities without limitations or dead ends.

The Accelerator for .NET is a base set of functionality, core structured architecture and wizard-driven code generation, which allows for business solutions to be developed faster, to better standards, and with more functionality than otherwise possible. It opens the full power of .NET for developers, and empowers software developers to efficiently build enterprise quality software specific to business needs. This product will accelerate the development process to make it faster, better and allow you to deliver more functionality than is ordinarily possible.

Accelerator™ for .NET V3.3 includes several new features:

- Multi-module Tree View View data from related modules in an easy-to-read tree view. Click to
  preview and double click to edit capabilities for all data from a single content window.
  [See additional media below: MMTV.jpg]
- Auto Refresh with Count-down Timer Refresh the data in a content window using a preset time interval. Users can set timers per modules and their settings are remembered at sign on. [See additional media below: AR.jpg]
- Spool File Modules Search, view and export spool files located on your IBM i.
- Remarks Modules Save notes/remarks on any record in a system. Control visibility from user security permission.
   [See additional media below: RM.jpg]
- User Sign-on/Sign-off Tracking System level logging of every user who signs on and off. Tracks orphan sign ons and erroneous sessions. [See additional media below: SOSF.jpg]
- Application Record Locking Editable records are locked upon opening. Based on security
  permissions other users attempting to view the same record are given either read-only or denied
  access messaging.

[See additional media below: ARL.jpg]

Many Speed Improvements and Miscellaneous Bug Fixes

These new features expand an ever growing list of features created to expand and modernize legacy systems. The Accelerator allows for a range of options, from reusing code in the background while building a rich user interface, to completely rebuilding systems, and everything in between. Expanded information regarding enhancements to Accelerator™ for .NET Version 3.3 can be obtained at the following website www.surroundtech.com/SoftwareSolutions/Accelerator\_Development\_Solutions.aspx or by requesting additional materials from Lee Paul, CEO/Media Contact for this release.
