**FOR IMMEDIATE RELEASE**

## **Surround Technologies Announces Accelerator™ with New Look Integration for the Web Line-of-Business**

*Bloomfield, NJ – November 29, 2016* – Surround Technologies is excited to announce Accelerator's integration with Newlook from Looksoftware, a division of Fresche Legacy, for its latest responsive desktop-style web application. Building upon the existing Accelerator with Newlook strategy for Windows, which provides options to reuse existing IBM i 5250 screens and RPG/Cobol code, users can now apply all the benefits of the Accelerator WPF technology in a responsive web and mobile user interface. The latest integration of Newlook into the Accelerator's desktop-style web application leverages the latest in web development technology such as HTML5, CSS3 and JQuery to create an intuitive interface accessible from any desktop or mobile device with a browser. It provides the ability to modernize your existing RPG or Cobol based system running on the IBM i or IBM System z with completely new well architected software all without writing any code or having to change any of the existing legacy system. Developers can then rewrite what matters most at a pace that makes good business sense. This helps the business achieve both short-term tactile needs and the long-term strategic goal.

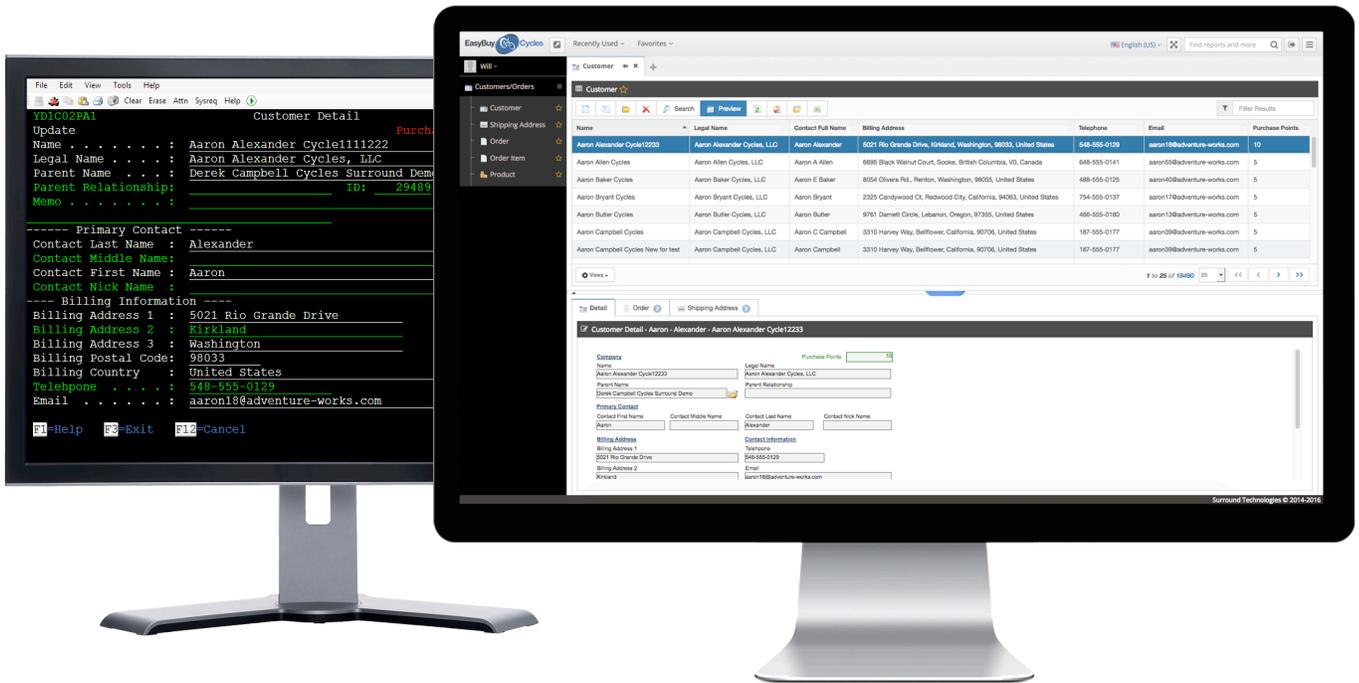

The latest integration of Newlook into Accelerator by Surround Technologies answers customers' needs for a desktop-style responsive web application for all your line-of-business needs, which allows those on the IBM to modernize their systems without boundaries, limits or wasting time. It allows the green screen to break out of its terminal and run on Windows, Macs, Linux, Chrome Books, iPhones, Android – anywhere there is a browser with no coding needed. The engine understands the labels, field layouts, function keys and other elements of your screen layout and replaces them in a friendly user interface with modern navigation, search and browsing capability. In minutes developers can generate a fully functional web application from green screens without the need to write a single line of HTML. Accelerator is now capable of providing developers super powers to rewrite or reuse existing code to create better software, faster than before, with more functionality for Windows, Web and Mobile devices – total coverage from a single source.

See included media for examples of a generated responsive desktop-style line-of-business web application using Accelerator's Newlook Integration with no coding needed. To experience the Newlook integration first hand, download the Accelerator Version 7 Trial, or visit [surroundtech.com/events](http://surroundtech.com/events) for live webinars and other events.

Accelerator Version 7 is available to try free for new users who want to start developing smarter – and creating software their users will love. The Free Trial along with a quick-start installation guide and support information can now be downloaded by visiting [www.surroundtech.com/trial](http://www.surroundtech.com/trial). Release notes and upgrade support can be found by visiting the Surround Technologies Support Portal at <http://support.surroundtech.com>. Accelerator allows for a range of options, from reusing code while building a rich user interface, to completely rebuilding systems, and everything in between. Additional Information can be found on <http://www.surroundtech.com> or by requesting additional materials from Lee Paul, Media Contact for this release.

**Additional Media 2:** Line-of-Business Customer Reuse Module with Green Screen behind the scenes

The screenshot shows a web browser window displaying a customer management interface. The top navigation bar includes 'EasyBuy Distributors', 'Recently Used', and 'Favorites'. A sidebar on the left lists navigation options: 'Customer', 'Order', 'Order Item', 'Product', 'Shipping Address', and 'NewlookSession'. The main content area features a table of customer records with columns for Name, Legal Name, Contact Last Name, Contact First Name, Contact Middle Name, Billing Address 1, and Billing Address 2. Below the table, there are 'Views' and pagination controls showing '1 to 25 of 18490' records. A 'Detail' view is open for 'Aaron Alexander Cycles', showing fields for Company Name, Parent Name, Primary Contact (First, Middle, Last, Nick Name), and Billing Address. A green screen with a black triangle is overlaid on the 'Company Name' field, indicating a reuse or update action.

Name	Legal Name	Contact Last Name	Contact First Name	Contact Middle Name	Billing Address 1	Billing Address 2
Aaron Alexander Cycles	Aaron Alexander Cycles, LLC	Alexander	Aaron		5021 Rio Grande Drive	Kirkland
Aaron Allen Cycles	Aaron Allen Cycles, LLC	Allen	Aaron	A	6695 Black Walnut Court	Sooke
Aaron Baker Cycles	Aaron Baker Cycles, LLC	Baker	Aaron	E	8054 Olivera Rd.	Renton
Aaron Bryant Cycles	Aaron Bryant Cycles, LLC	Bryant	Aaron		2325 Candywood Ct	Redwood City
