

*Creating software people love!*

& Sharing COMMON Interests

Welcome to: **Booth 214**

**2016** Annual Meeting and Exposition  
NEW ORLEANS | MAY 15-18, 2016

We are  
**Software Development  
& Modernization**  
***SUPERHEROS***

With  
**The Right Strategies**  
**The Right People**  
**The Right Processes**  
**& The Right Tools**

To Accelerate the Development  
of **Software People Love!**

You will  
**build powerful  
applications FAST**

and  
**change them  
even faster!**

**Solutions for:**  
**Mobile**  
**Web**  
**Windows**  
**Integration**

# DEVELOP

FASTER

BETTER

MORE

# *SMARTER*

**Reach your**  
**Software Superhero Status!**

# Software Architecture

Your business executives want software that can *quickly* adapt to today's rapidly changing technologies and robust enough to stand the test of time.

# User Experience Design

Your users want *instant response* and the ability to achieve their objectives *quickly* and *effortlessly*.

They are looking for an experience so engaging, intuitive and effective that the tool itself becomes invisible.

# Proven Processes

You need to be able to provide clear details about a project and set the appropriate expectations for the users and business executives alike.

This means you need to be able to accurately assess and estimate projects scope, effort and timeframes; define and communicate a strategy; and execute to and through delivery.

# Innovative Solutions

Your business needs innovative modern solutions to keep up with the rapid and continually changing business environments.

To deliver productive software to users **where and when they need it.**

# Skilled Consultants

Sometimes you need a little extra horsepower or people with other skillsets and experience or some training to get up to speed on a new technology.

**Don't go it alone! Skilled consultants add great value to the business!**

# Trusted Partners

Technologies are changing faster and faster and your business needs to rely on partners that can be an extension of your team to keep up.

Partners that provide valuable experience and insight. *Partners you can **trust**.*

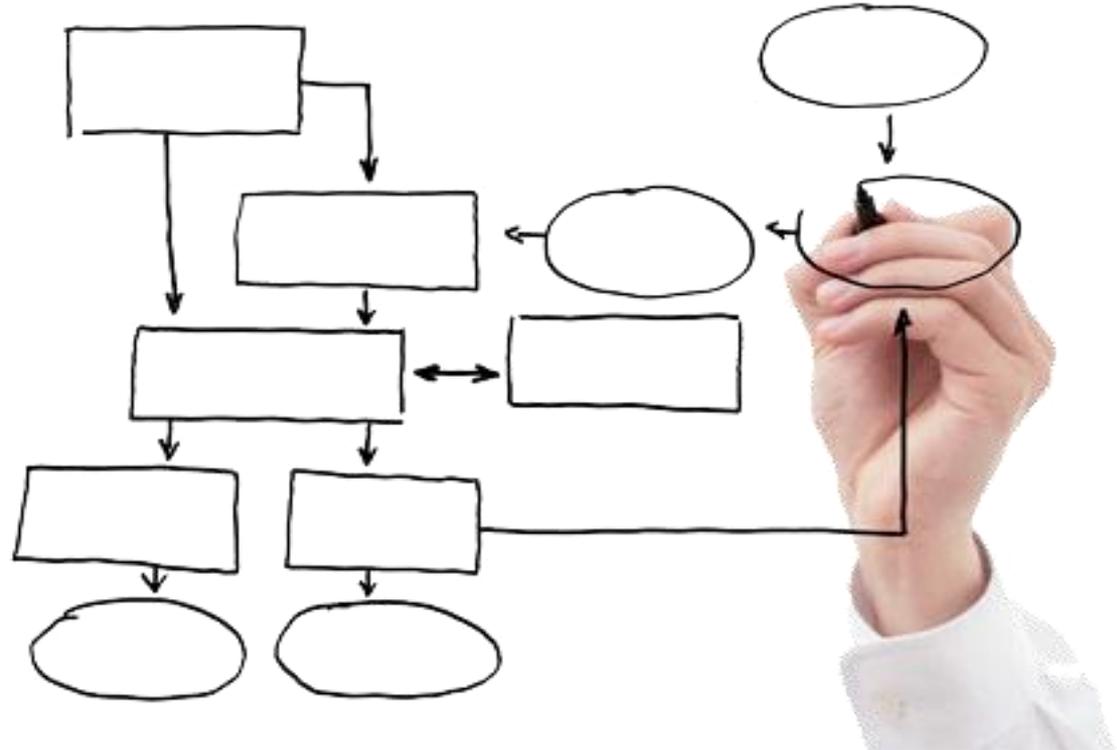

**We Create  
Software People  
*Love!***

**Our**  
**Business Offerings**

# Strategy People Process Tools

# Strategy and Discovery

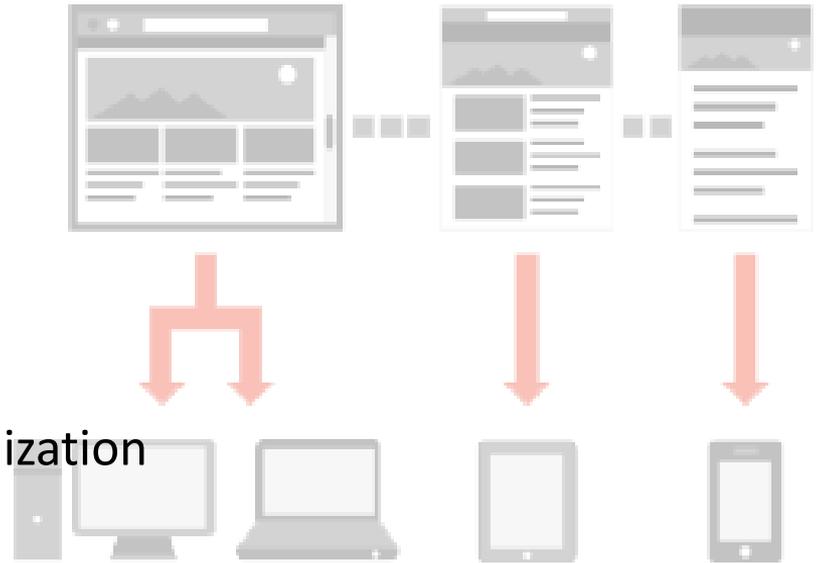

- Development Strategy and Process
- Modernization Strategy and Roadmaps
- Application Portfolio Analysis
- Analysis, Assessment and Scoping
- Business Process Mapping
- User Experience Consulting
- Project Management

# Software Development

- Windows, Web and Mobile Applications
- Software Architecture
- User Experience Design
- Database Design
- Systems Integration
- On-premise, cloud and hybrid enablement
- Managed/Turn-key Software Development

# Software Modernization

- IBM i (AS/400, iSeries, System i) Modernization
- IBM z Systems Modernization
- Windows Application Modernization
- Web Application Modernization
- Database Modernization
- RPG, Cobol, CA 2E (Synon), LANSAs Modernization
- Tool assisted re-architecting/rewrite
- Business Rules Extraction

# Education

- Onsite and public course options
- Windows, Web and Mobile Development Training
- Microsoft .NET Training
- Accelerator Development Training
- On Demand Mentoring and Development

# Accelerator Business Solutions and Productivity Tools

- Core Software Architectures and Frameworks
- Software Generation
- Authentication and Security
- Operational Management
- Portals - CRMs and Intranets
- Workflow Process and Automation
- Application Content Management Systems, CMS
- Document Management
- Pre-built enterprise software plug-ins

# Today's On-demand **Demonstrations**

# Mobile, Web and Windows

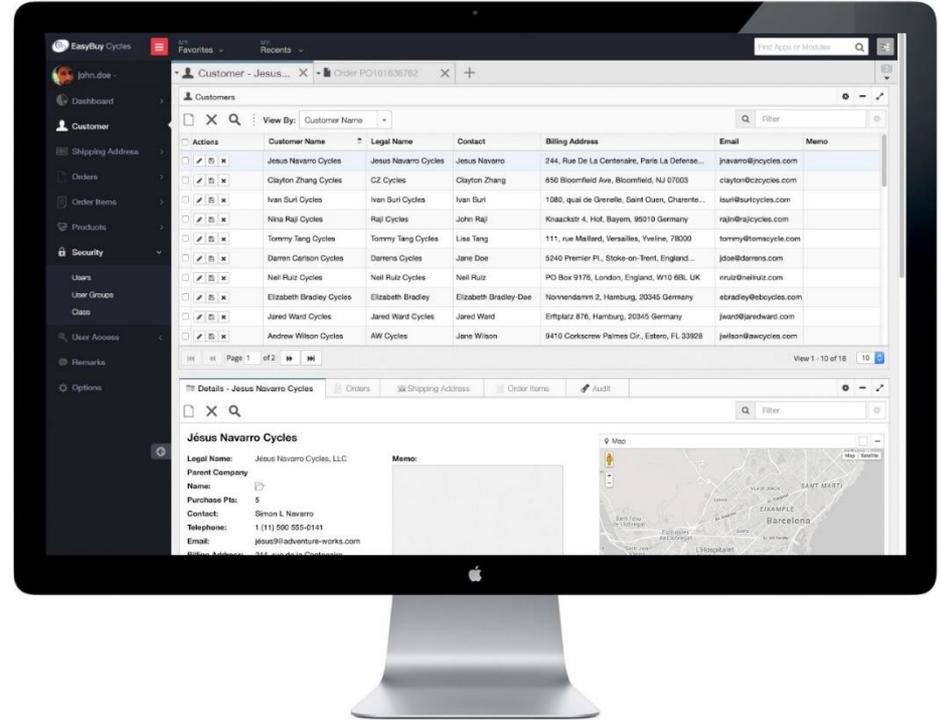

Demonstrate LOB system in  
Mobile, Web and Windows  
using Easybuy Cycles System  
built in *less than a day*

# System Generation

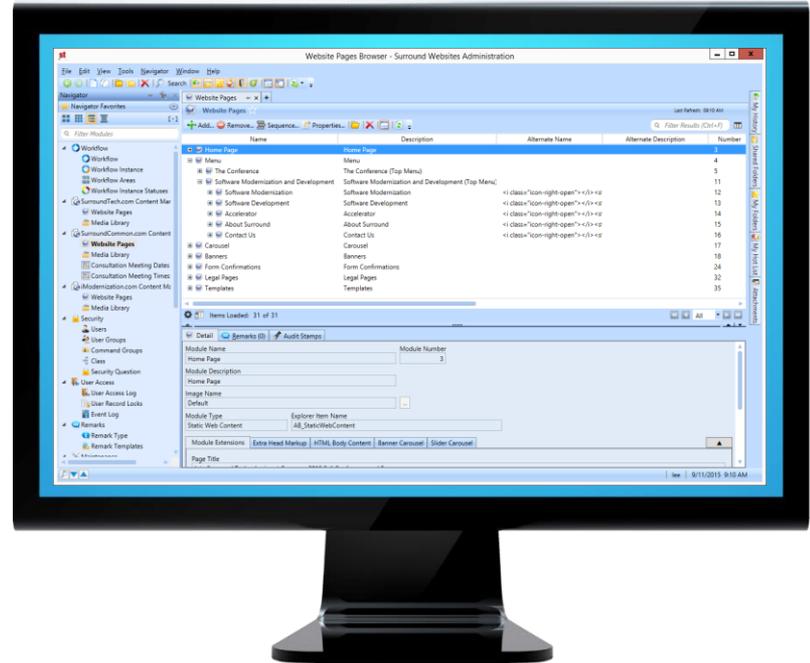

Generate the LOB System  
in **5 to 10 minutes** using  
Easybuy Cycles Database

# Website Content Management

See how easy it is to manage *static*, *dynamic* and *database driven* content across **multiple systems**, **sites** and **customers**.

# *Super Powered* Customers

See how other customers have used our solutions and achieved *software **super powers** of their own.*
